REPRESENTATIVE ANN KIRKPATRICK (ARIZONA – 02)

Party Affiliation
Democrat

Representative Replaced
Martha McSally (R)

Committee Assignments
Agriculture; Appropriations (Subcommittees on Energy & Water Development; Defense; and Financial Services and General Government)

Prior Public Service
U.S. House of Representatives (2012-2016, 2008-2010)
Arizona House of Representatives (2004-2008)

Line of Work
Attorney, Politician

Major Campaign Agenda Items
“I am committed to an economy that works for everyone, and that starts with improving our schools, protecting our farms and ranches, paying down our debt, and protecting Social Security and Medicare.”

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
Endorsed Clean Energy for a Healthy Arizona (Proposition 127)

Public Statements/Positions on Climate
“Ann believes we must fight global climate change and reduce our carbon footprint before it is too late. She strongly supports developing a wide range of alternative energy sources in Arizona to create 21st-century jobs and free America from its dependence on foreign oil.”

“I believe we have to balance protecting the environment and keeping jobs.”

Public Statements/Positions on Energy
“We need a national energy strategy. We should lean toward solar and encourage battery cars, electric cars. Arizona should take the lead.”

Public Statements/Positions on Energy Efficiency
Voted to defund the Office of EERE with the Energy and Water Development and Related Agencies Appropriation Act in 2015 and voted against the Home Star Energy Retrofit Act of 2010

Public Statements/Positions on Transportation
“More recently, she and Congressman Gosar have once again teamed up on Arizona-focused legislation, introducing a bill that advances the Interstate-11 project and strengthens Southern Arizona’s position as a transportation corridor.”

Clean Energy Jobs in District
4,822 EE jobs in District 2

REPRESENTATIVE GREG STANTON (ARIZONA – 06)

Party Affiliation
Democrat

Representative Replaced
Kyrsten Sinema (D)

Committee Assignments
Transportation & Infrastructure; Judiciary (Subcommittee on Courts, Intellectual Property and the Internet)

Prior Public Service
Mayor of Phoenix (2012-2018), Phoenix City Council (2000-2009)

Line of Work
Attorney, Politician

Major Campaign Agenda Items
Healthcare, Social Security and Medicare, quality education, infrastructure, immigration, economic development, LGBT and gender equality, environment and water, campaign finance reform

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
As Mayor, passed a climate action plan that aims for Phoenix to be carbon-neutral by 2050.
As Mayor, undertook environmentally friendly initiatives, like changing more than 10,000 city streetlights to LEDs, expanding Phoenix's solar energy capacity, making municipal buildings more energy efficient, and converting more methane released from landfills into electricity

Public Statements/Positions on Climate
"The science is clear: our climate is changing, and urgent action is required... But, opportunities abound to continue positioning Arizona as a world leader in clean energy, creating a new supply of good jobs for the future."

Public Statements/Positions on Energy
"In Congress, I'll continue fighting to expand the clean energy economy and support renewable energy sources so we can solidify our position as a world leader in this critical industry. Solar jobs in Arizona grew by 15 percent last year to nearly 10,000, but we can do better. We also must tap into our underutilized wind energy resources to both boost renewable energy production and create jobs."

Public Statements/Positions on Energy Efficiency
"When it comes to energy efficiency, the City of Phoenix leads by example. We don't ask others to do what we aren't willing to do ourselves...So it was gratifying – but not surprising – to see our local government lead the nation in energy efficiency." (on Phoenix sharing the number 1 rank for ACEEE's big-city local government for energy efficiency ranking)

Public Statements/Positions on Transportation
"A great city, a great community, is truly multi-modal, and has many forms of transportation that work well. I want to make sure that people understand that from my perspective, great public transportation, great bikeability, great walkability, is of equal value as those cars on the road."

Clean Energy Jobs in District
12,041 EE jobs in District 6

REPRESENTATIVE JOSH HARDER (CALIFORNIA – 10)

Party Affiliation
Democrat

Representative Replaced
Jeff Denham (R)

Committee Assignments
Agriculture; Education & Labor (Subcommittees on Health, Employment, Labor and Pensions; and Higher Education and Workforce Development)

Prior Public Service
None

Line of Work
Venture capitalist

Major Campaign Agenda Items
Healthcare, immigration, jobs, water, electoral reform, women’s rights, education, gun control, veterans, housing and homelessness, ADA

Career Related to Energy Efficiency and/or Clean Energy
None

Public Service Accomplishments on EE and/or Clean Energy
None

Public Statements/Positions on Climate
“I strongly believe in the scientific consensus that climate change is real and man-made. I will fight back against the Trump Administration’s dangerous attempts to undermine the Environmental Protection Agency and undo international agreements on climate change.”

Public Statements/Positions on Energy
“Instead, we must make sure there are adequate incentives to invest in clean energy sources and move away from polluting fossil fuels.”

Public Statements/Positions on Energy Efficiency
Campaign agenda item on water includes investing in water efficiency

Public Statements/Positions on Transportation
None of particular relevance

Clean Energy Jobs in District
3,599 EE jobs in District 10

REPRESENTATIVE TJ COX (CALIFORNIA – 21)

Party Affiliation
Democrat

Representative Replaced
David Valadao (R)

Committee Assignments
Agriculture; Natural Resources (Subcommittees on Oversight and Investigations [Chair]; and Water, Oceans and Wildlife)

Prior Public Service
None

Line of Work
Engineering and construction
Businessman

Major Campaign Agenda Items
Jobs, health care, immigration, water, seniors, education, special interests

Career Related to Energy Efficiency and/or Clean Energy
In 2010, TJ cofounded the Central Valley Fund, which has raised and invested more than \$65 million dollars to build health clinics, job training centers, affordable housing, and clean energy plants

Public Service Accomplishments on EE and/or Clean Energy
None

Public Statements/Positions on Climate
“Environmental values are community values in the truest sense. In Congress, I will advocate to bring more green jobs to the Central Valley and create a sustainable economy for our rural communities.”

“Bakersfield & Visalia have the 2nd & 3rd worst ozone & soot pollution in the U.S. I believe in Climate Change and will vote to preserve the Central Valley for future generations.”

REPRESENTATIVE KATIE HILL (CALIFORNIA – 25)

Party Affiliation
Democrat

Representative Replaced
Steve Knight (R)

Committee Assignments
Armed Services (Subcommittees on Seapower and Projection Forces; and Tactical Air and Land Forces); Oversight & Reform [Vice Chair] (Subcommittees on Economic and Consumer Policy; and Environment); Science, Space & Technology (Subcommittee on Space)

Prior Public Service
None

Line of Work
Nonprofit

Major Campaign Agenda Items
Safety and security, rebuilding the middle class, representative government, healthcare

Career Related to Energy Efficiency and/or Clean Energy
None

Public Service Accomplishments on EE and/or Clean Energy
None

Public Statements/Positions on Climate
"Protecting the planet is not just an environmental issue, but a human health issue... In 2015, the Department of Defense informed Congress the implications of climate change included aggravating global issues, such as poverty, social tensions and food shortages. These are all threats to vital human health and sustainability that we must take seriously and should inspire us to do whatever it takes to reverse the damage done to our environment."

Public Statements/Positions on Energy
"Right here at home, the Aliso Canyon gas blowout is an example of how non-renewable energy sources and corrupt energy companies can have a detrimental effect on our environment. We must shut down this facility now and move to 100% clean energy, get off fossil fuels, and stop building new power plants."

REPRESENTATIVE KATIE PORTER (CALIFORNIA – 45)

Party Affiliation
Democrat

Representative Replaced
Mimi Walters (R)

Committee Assignments
Financial Services (Subcommittees on Consumer Protection and Financial Institutions; and Investor Protection, Entrepreneurship and Capital Markets)

Prior Public Service
Appointed by then-CA attorney general Kamala Harris to monitor banks in 2012 in a post-collapse mortgage settlement

Line of Work
Education, Consumer-protection and bankruptcy law

Major Campaign Agenda Items
Medicare for all, women’s health, gun reform, immigration, public education, environment

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
“Climate change is an existential threat to our species and our planet. And if we don’t take drastic, global measures to cut greenhouse gas emissions, it will have a devastating impact on our way of life here in Southern California”

Public Statements/Positions on Energy
“Clean energy jobs are one of our fastest growing industries here. And so both for our environment and economy, [Walters’] environmental policy is really harmful to families here.”

“Orange County communities and families here have too much at stake to allow Trump and Walters to take us backward. I’d take the opposite approach, and here are just some places I would start: Force Washington to live up to our Paris accord promise to cut emissions by 80% by 2050... Enact sweeping national legislation to drastically cut greenhouse gas emissions; Increase federal investment in truly renewable energy sources; End billions in tax breaks that Big Oil, coal and the fossil fuel industry receive; Add to federal emission standards – especially diesel vehicles and power plants...”

REPRESENTATIVE HARLEY ROUDA (CALIFORNIA – 48)

Party Affiliation
Democrat

Representative Replaced
Dana Rohrabacher (R)

Committee Assignments
Transportation & Infrastructure (Subcommittees on Highways and Transit; and Water Resources and Environment); Oversight & Reform (Subcommittees on Environment [Chair]; and National Security)

Prior Public Service
None

Line of Work
Businessman (Real Estate), Attorney

Major Campaign Agenda Items
Economic development, high quality education, gun reform, health care, campaign finance reform, environment

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
“...as Republican leaders in Washington continue to deny the threat of man-made climate change, the pristine natural beauty which makes our home district so special is under attack. I will work to protect California’s most precious asset, our beautiful coastlines, from offshore drilling.”

Included in Rouda’s partial set of priorities for the U.S. House is addressing global warming and its clear long-term impact on historical weather patterns and rising oceans.

Public Statements/Positions on Energy
“We need to focus on consistently choosing clean energy over the fossil fuels of the past. As a businessman, I know firsthand that protecting the environment and incentivizing economic growth are not mutually exclusive goals, and that is why I support making Southern California the clean tech capital of the world. Clean energy innovation is not only better for the environment, but it also creates high paying jobs, economic growth, prosperity, energy choice and freedom from foreign dependence.”

Included in Rouda’s partial set of priorities for the U.S. House is reducing the nation’s use of fossil fuels and investing more in clean, renewable energy and promoting fuel efficiency and adoption of electric vehicles.

Clean Energy Jobs in District
5,158 EE jobs in District 48

REPRESENTATIVE MIKE LEVIN (CALIFORNIA – 49)

Party Affiliation
Democrat

Representative Replaced
Darrel Issa (R)

Committee Assignments
Veterans' Affairs (Subcommittees on Economic Opportunity [Chair]; and Health); Natural Resources (Subcommittees on Energy and Mineral Resources; and Water, Oceans and Wildlife)

Prior Public Service
Executive Director of the Democratic Party of Orange County
National Finance Committee for Hillary Clinton's 2016 campaign

Line of Work
Clean energy, Attorney

Major Campaign Agenda Items
Environmental protection and clean energy, health care, infrastructure

Career Related to Energy Efficiency and/or Clean Energy
CleanTech OC (co-founder; clean energy trade association)
FlexEnergy (methane capture from landfills and wastewater treatment facilities technology)
FuelCell Energy (director of government affairs)
Better Energy Systems (vice president; cleantech startup)
Center for Sustainable Energy (board member)

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
"I believe strongly in the overwhelming scientific consensus that climate change is driven by human activity. I will be an outspoken opponent of any and all efforts by the Trump Administration to undermine our global leadership on climate and sustainable energy policy issues."

"In order to reduce carbon emissions, I believe we must consider several ideas, including a "revenue-neutral carbon tax" that would impose a price on carbon dioxide, which would be matched dollar for dollar with corresponding cuts of existing taxes. We must also continue to explore cap-and-trade policies to reduce emissions, which have been proven to be largely effective when implemented in California and at the federal level."

Public Statements/Positions on Energy
"I feel that a transition to a sustainable energy future is imperative, due to both our depleting natural resources and the environmental impact of fossil fuel use and extraction. The question is whether Americans will be using clean energy technologies developed and manufactured in Asia and Europe, or whether our federal government will spur clean energy innovation to help America lead in this rapidly-growing industry."

Public Statements/Positions on Energy Efficiency
"I am a clean energy advocate and environmental attorney with over a decade of experience working at both the state and the federal level to try and pass legislation and better regulations to reduce greenhouse gas emissions, deal with air and water quality issues, improve the energy efficiency of buildings, deploy more electric vehicles."

“I believe that we must transition from fossil-fuel based power production to sustainable, renewable alternatives, particularly in our district. In the December 22, 2016 San Diego Union-Tribune, I criticized the proposed Carlsbad Energy Center, noting that it “runs counter to the energy-use practices that Californians are adopting in terms of clean distributed power generation combined with investments in energy efficiency.””

Public Statements/Positions on Transportation

“As a clean energy advocate and environmental attorney, I have worked on several successful efforts to combat climate change, reduce emissions from power generation, improve the energy efficiency of buildings, and deploy more electric vehicles and clean transportation solutions.”

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
“Climate change is a severe threat to the planet, people, and our nation. Congress must act to reduce carbon pollution and other emissions to protect against further impacts of climate change, but it must also work to help communities adapt to an already changing climate.”
Climate and energy agenda: re-commit to Paris Climate Accord, implement Clean Power Plan, work towards comprehensive climate policy, invest in clean energy technology

Public Statements/Positions on Energy
“America’s economy and environment both demand a forward-looking comprehensive energy policy that prioritizes a rapid transition to clean energy while protecting American jobs and promoting economic growth. I will fight for an energy policy that will build a clean energy economy that allows the U.S. to once again be the world leader in energy development, innovation, and environmental protection while moving the American economy away from fossil fuels over the next few decades to address climate change.”

REPRESENTATIVE DONNA SHALALA (FLORIDA – 27)

Party Affiliation
Democrat

Representative Replaced
Ileana Ros-Lehtinen (R)

Committee Assignments
Rules; Education & Labor (Subcommittees on Early Childhood, Elementary and Secondary Education; and Health, Employment, Labor and Pensions)

Prior Public Service
Secretary of Health and Human Services (1993-2000)
Assistant Secretary for Policy Development and Research at HUD (1977-1980)

Line of Work
Education, Nonprofit, Public servant

Major Campaign Agenda Items
Climate change, jobs and the economy, immigration, health care, education, gun control, traffic and infrastructure, women's rights

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
Fought to install solar panels on the White House while at HUD

Public Statements/Positions on Climate
"The United States must once again assume a position of leadership in an international, coordinated response to the threat posed by global warming, and the first step in that direction is to fully rejoin the Paris Climate Accord."

Public Statements/Positions on Energy
"Domestically we need to invest in clean energy infrastructure, facilitate and encourage the installation of solar panels in as many American homes as possible and progressively tighten efficiency standards as they pertain to transportation, housing and the workplace."

Public Statements/Positions on Energy Efficiency
None of particular relevance

Public Statements/Positions on Transportation
"Donna Shalala is committed to promoting innovative solutions to help alleviate traffic concerns and will fight for the resources to improve local infrastructure – including roads, bridges, mass transit options, airports and seaports – allowing efficient movement of people and goods throughout our region."

Transportation platforms include: expanding local trolley routes; implementing Bus Rapid Transit along US1; increasing reliability and expand the Metrorail; investing in high tech road technology like synchronizing traffic lights to improve efficiency

Public Service Accomplishments on EE and/or Clean Energy
While serving in Iowa legislature, Finkenauer publicized the role of certain fossil fuel lobbyists in drafting legislation to transfer control of the Iowa Energy Center at Iowa State University.

Public Statements/Positions on Climate
“Today we face more urgent and pressing dangers to our environment, our economy, and the future health of Iowans than ever before. Our planet is warming at a quickening rate and large corporations are taking advantage of every loophole they can to pollute our environment so they can make a slightly larger profit at the expense of American families – all while working to set back our clean energy economy that creates jobs for Iowans... The effects of climate change are projected to shrink [Iowa’s] local economic output by up to 5%, and it will be working families that bear the brunt of that damage.”

Public Statements/Positions on Energy
“I will make it a priority to support policies that continue this growth and preserve our status as a national leader in clean energy production, while at the same time strengthening our renewable energy manufacturing sector to create even more good jobs at good wages for Eastern Iowans.”

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
“Climate Change is a real phenomenon that has been exacerbated and accelerated by human activities including our uncontrolled emissions of vast quantities of carbon dioxide and other global warming chemicals into the atmosphere.”

Public Statements/Positions on Energy
“We can minimize further damage to the environment by reducing emissions of greenhouse gases as was proposed in the Obama Clean Energy plan and with support for alternative energy sources, more efficient houses and cars, etc. In order to achieve this, we need to invest in our infrastructure, encourage research and development with both public and private funds, and incentivize the implementation of new technologies.”

Public Statements/Positions on Energy Efficiency
None of particular relevance

Public Statements/Positions on Transportation
Supports greater investment in transit and transportation focused on neighborhood investment and impacts, as well as on regional transportation efforts (freight, roads, bridges, ports, airports) that keep the region’s (Chicago) competitive advantage because of the area’s highways, ports, railways, and international airports.

Co-founder of Recycled Energy Development (RED)
Founding chairman of Northeast Combined Heat and Power Association
Chairman of U.S. CHP Association

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
In Congress, will work to improve climate and energy policies by championing output-based pollution standards, pass a national Fossil Energy Reduction Standard, support nationwide CO2 regulation and more.

Public Statements/Positions on Energy
In Congress, will work to improve climate and energy policies by replacing tax credits with revenue grants for clean energy sources, eliminating economically inefficient cross-subsidies that discourage clean energy development, supporting Wyden’s bill on clean energy tax credits, and more.

“Energy and environmental policy must incentivize goals, not paths... We provide wildly different incentives and mandates for technologies that deliver otherwise identical environmental outcomes... Shifting to a goal-based regulatory model would unleash massive economic activity while simultaneously rewarding environmentally beneficial outcomes.”

“On the margin, tax policy is a bad way to incentivize investment. Businesses that meet social goals to invest in clean energy technology typically have very little taxable income... Providing further tax incentives... too often provides tax credits that businesses can’t use.”

“The U.S. must use the power of competitive markets to encourage energy innovation, coupled with a strengthened antitrust program.”

Public Statements/Positions on Energy Efficiency
In Congress, will work to improve climate and energy policies by eliminating efficiency disincentives in the Clean Air Act

“There is no inherent trade-off between increased energy efficiency and economic gain.”

“Modernizing the Clean Air Act to incentivize and reward energy efficiency and conservation is critical to ensure we protect the planet and reduce CO2 as quickly – and as cheaply – as possible.”

“Energy efficiency is the common thread that unites the overwhelming majority of the country’s businesses and consumers, but gets short-shrift in our energy policy. And unlike extractive industries, energy efficiency is fuel-agnostic. Good policy should always first maximize the efficiency for all fuel sources and only then get bogged down in the merits of any particular fuel.”

Public Statements/Positions on Transportation

“We must work to repair our roads and bridges, and I have publicly called for an increase in the gas tax if necessary to fund. We should also recognize that our rail system is too often held to a different standard than our highways, insofar as it is expected to cover all its costs while highways are treated only as an expense. This has misallocated our infrastructure dollars and should be rectified. And we should not neglect providing sufficient funding for bicycle and pedestrian infrastructure with a focus on safety.”

Public Statements/Positions on Climate
“The impact of climate change is being felt nationally and can be seen here in Michigan. I believe climate change is an issue that must be taken seriously, and prudent planning should be undertaken to prepare for and mitigate its negative impacts. During my time at the Pentagon, my team participated in the first ever climate change survey which studied how rising sea-levels, increased temperatures, and a higher frequency of superstorms could impact our military bases. We must be realistic about our changing climate and prepare our state’s economy, communities, and environment for the impact of climate change — and get serious about how to stop it.”

Public Statements/Positions on Energy
“I will be a vocal champion for Michigan moving to the frontier of the “green-economy,” helping to accelerate wind and solar jobs in our state. Since Michigan has always been a leader in advanced manufacturing, we should be leading the pack in the development of renewable energy technologies, creating a new generation of high-skill, well-paid jobs here in Michigan.”

Major Campaign Agenda Items
Restoring the middle class, universal health care, environment, human rights, defending democracy

Career Related to Energy Efficiency and/or Clean Energy
Founder and CEO, Levin Energy Partners, LLC
Created Lean & Green Michigan, a statewide market to finance clean energy building improvements—today, 68 percent of Michiganders live in Lean & Green Michigan jurisdictions, and are starting to choose energy efficiency, water efficiency and renewable energy projects

Public Service Accomplishments on EE and/or Clean Energy
“AT DELEG, Levin helped drive Michigan's energy policy and promoted energy efficiency and renewable energy initiatives. A few examples: anticipating federal investment in energy efficiency and renewable energy, Levin created Michigan's \$6 million Green Jobs Initiative in 2008; working with major auto manufacturers, engineering companies and universities to create the Michigan Academy for Green Mobility, an employer-driven academy that trained hundreds of unemployed and incumbent engineers to work on vehicle electrification; Levin commissioned and oversaw the development of the first-ever Michigan Green Jobs Report, which won a national award in 2009 for the best demographic research in labor market information.”

Public Statements/Positions on Climate
“Above all, we must address climate change with tremendous urgency. Saving our planet and our people from global warming is a moral imperative, but it's also an economic opportunity.”

Public Statements/Positions on Energy
Created Lean & Green Michigan to help businesses and nonprofits retrofit buildings for energy and water efficiency and renewable energy. This program has facilitated over \$20 million in clean energy projects, created jobs, made businesses more efficient, and reduced their carbon footprint. Levin supports the deployment of electric vehicles, solar, wind, biomass, and other clean energy along with advanced batteries.

Public Service Accomplishments on EE and/or Clean Energy
"Through my work on the U.S. Auto Rescue, I established a track record of working on behalf of policies that cracked down on harmful emissions. Under the Cash for Clunkers program as part of the U.S. Auto Rescue efforts, consumers were encouraged to trade in vehicles with fuel economy of 18 miles per gallon or fewer in exchange for refund vouchers worth \$3,500 to \$4,500... I have worked with manufacturers to support investments in clean and renewable energy through now-expired tax incentive programs that encouraged sustainable energy investment."

Public Statements/Positions on Climate
"I believe climate change is a serious problem and needs to be addressed immediately before it is too late. When an overwhelming number of scientists around the world have cited the realities and dangerous implications of climate change, this is not a partisan issue, but the global challenge of our generation that requires dedicated leadership to tackle."

Public Statements/Positions on Energy
"I believe the United States can lead the way in promoting a clean energy future"

Public Statements/Positions on Energy Efficiency
None of particular relevance

Public Statements/Positions on Transportation
"Michigan built the auto industry, it's unbelievable we have the country's worst roads... I'll fight for Michigan's fair share of federal road money, so we can find a permanent solution to our roads problem... we build the world's best cars—we deserve to drive them on the country's best roads."

Career Related to Energy Efficiency and/or Clean Energy
None of particular relevance

Public Service Accomplishments on EE and/or Clean Energy
None of particular relevance

Public Statements/Positions on Climate
"Dean knows that climate change is real — and as someone who drives an electric car and uses a geothermal system to heat and cool his home, he walks the talk."

Public Statements/Positions on Energy
"Dean will work to incentivize renewable energy from wind and solar, and for infrastructure investments to develop a clean and reliable electrical grid. He supports extending the 30% federal tax credit for solar and other renewable energy, rather than letting the credits decrease after 2019 and disappear altogether after 2021, as they will under current law."

Public Statements/Positions on Energy Efficiency
"Increasing energy efficiency is the most cost-effective and affordable way to reduce fossil-fuel consumption. Dean supports the extension of expired federal tax credits for energy-efficiency upgrades and the adoption of building-code standards that will save Americans billions of dollars on their energy bills, create domestic jobs, and improve health by reducing pollution. And with the effects of climate change upon us, Dean supports enhanced resiliency in our infrastructure and buildings, so that they can better withstand extreme weather events and achieve "passive survivability" if power is lost for an extended period of time."

Public Statements/Positions on Climate
“Climate change is devastating our planet. We have to dramatically increase investments in renewable energy and we have to build a green economy.”

Public Statements/Positions on Energy
Environmental platforms include: “ACHIEVE 100% RENEWABLE ENERGY—We need a complete shift away from fossil fuels. We must build a green society, invest in alternative energy sources and energy efficiency programs... TRANSITION TO A GREEN ECONOMY—We must break the fossil fuel industry’s monopoly over our energy grid and create a just transition to a green economy.”

Public Statements/Positions on Energy Efficiency
“We must build a green society, invest in alternative energy sources and energy efficiency programs. Energy efficiency alone is predicted to keep over \$2 trillion in the pockets of Americans by 2030 and will create millions of jobs and begin to beat back climate change.”

Public Statements/Positions on Transportation
Infrastructure platforms include: “TRANSITION TO A 21ST CENTURY INFRASTRUCTURE TO TRANSFORM OUR ENERGY, WATER AND TRANSPORTATION SYSTEMS— Support the MOVE Act [which establishes] regulations necessary to establish performance measures relating to multi-modal transportation connectivity and accessibility for states and metropolitan planning organizations to use to assess the connectivity and accessibility of roadways, public transit infrastructure, pedestrian and bicycle infrastructure, and other transportation infrastructure”

Public Statements/Positions on Climate
“Climate change is real and addressing it shouldn’t be a partisan issue. It’s an economic and national security issue that affects all of us. With 130 miles of coastline, New Jersey will pay a terrible price if we don’t take meaningful action to end our reliance on foreign fuels and transition to a clean energy economy.”

Public Statements/Positions on Energy
“Alternative energy sources like wind and solar can transform New Jersey’s energy sector, particularly in a state like New Jersey without a native fossil fuel industry. Here in New Jersey’s 11th District, we already have 600 solar jobs. In Congress I want to find partners to grow our clean energy economy and promote investment in innovation. The East Coast has the best offshore wind conditions in the world, and the costs associated with developing offshore wind continue to drop. In fact, McKinsey reported last year that they expect a 68 percent drop in offshore wind costs by 2020. I join the entire New Jersey congressional delegation in its opposition to the unnecessary risk posed by offshore drilling.”

Public Statements/Positions on Energy Efficiency
“By focusing on innovation in technologies like offshore wind and energy efficiency, New Jersey can lead the country in developing a clean energy economy.”

Public Statements/Positions on Transportation

Public Statements/Positions on Climate
“Extreme weather fueled by climate change is creating massive droughts across the Southwest, historic flooding across the Southeast, and is forcing people out of their homes from Louisiana to Alaska. We need to act fast to counteract climate change and keep fossil fuels in the ground.”

Public Statements/Positions on Energy
“I pledge to vote against all new fossil fuel infrastructure, and to fight instead for 100% clean energy – including tens of thousands of solar energy jobs for New Mexicans.”

“I’ll also fight with everything I have for a national public infrastructure bill that creates millions of jobs and rebuilds America’s crumbling roads, parks, bridges, energy, schools, and technology infrastructure. This bill should include massive investment in updating America’s energy grid to prepare us for 100% renewable energy, and millions of good union jobs that include living wages, full benefits, and fair scheduling.”

Public Statements/Positions on Energy Efficiency
“Water conservation should be part of incentives for household energy efficiency and corporate reduction of carbon emissions; and, we need to promote strategies for water conservation like harvesting rainwater and protecting and utilizing groundwater resources. Strategies like these at scale would mitigate high water consumption industries, like agriculture, while also preserving their livelihoods.”

Public Statements/Positions on Climate
“Climate change is the single biggest national security threat for the United States and the single biggest threat to worldwide industrialized civilization, and the effects of warming can be hard to predict and self-reinforcing. We need to avoid a worldwide refugee crisis by waging a war for climate justice through the mobilization of our population and our government. This starts with the United States being a leader on the actions we take both globally and locally.”

“In order to address runaway global climate change, Alexandria strongly supports transitioning the United States to a carbon-free, 100% renewable energy system and a fully modernized electrical grid by 2035. She believes renewable fuels must be produced in a way that achieves our environmental and energy security goals, so we can move beyond oil responsibly in the fight against climate change. By encouraging the electrification of vehicles, sustainable home heating, distributed rooftop solar generation, and the conversion of the power grid to zero-emissions energy sources, Alexandria believes we can be 100% free of fossil fuels by 2035.”

Supports implementation of a “Green New Deal.”

Public Statements/Positions on Energy
See statement above

Public Statements/Positions on Energy Efficiency
The Green New Deal included a goal of “upgrading every residential and industrial building for state-of-the-art energy efficiency, comfort and safety.”

Public Statements/Positions on Climate
“In the State Assembly, Joe helped pass the Climate and Community Protection Act (A8270B) – the nation’s most ambitious climate protection bill. In addition, Joe has supported measures to safeguard New York’s coastal waters and protect the economies that rely on them by banning offshore drilling (A9819), he voted to ban hydraulic fracturing, and the transportation and storage of hydraulic waste in New York State (A5424), and helped pass legislation that ensures clean air and water are treated as fundamental rights for New Yorkers (A6279).”

Supports rejoining the Paris Climate Accord

Public Statements/Positions on Energy
Supports efforts to reduce national carbon emissions by 50% by 2030 and working toward achieving a 100% clean energy economy by 2050, full EPA funding, clean energy incentive programs, legislation expanding investments in renewable energies, closing loopholes that exempt drilling and fracking operations from abiding by standards within the Clean Water Act and Safe Drinking Water Act, and opposes new offshore fossil fuel drilling

Public Statements/Positions on Energy Efficiency
None of particular relevance.

Public Statements/Positions on Transportation
“Joe understands that by making critical investments in the improvement and maintenance of our transportation systems we are securing the long-term stability of our nation’s infrastructure and ensuring the safety of commuters and travelers. In addition, investing in our transportation infrastructure will bolster local job growth, support larger development projects, and ultimately strengthens our nation’s economy.”

Public Service Accomplishments on EE and/or Clean Energy
Endorsed by the League of Conservation Voters (LCV) who said: “She has a proven track record in Pennsylvania of supporting common sense policies to address climate change and defending our public lands.”

Public Statements/Positions on Climate
“Lawmakers have a responsibility to protect and preserve our environment, air, water, and land for ourselves and for the generations to come. This means putting conservation before exploitation of our natural resources, and robustly funding organizations like the Environmental Protection Agency (EPA) who oversee essential regulatory practices. The United States must be a global leader in environmental preservation. This starts with our country rejoining the Paris Environmental Agreement.”

Public Statements/Positions on Energy
“Technological advancements have also made 100% renewable energies attainable within our lifetime. With governmental commitment, the rapidly growing green energy industry has the ability to stimulate our economy, create jobs, and help our environment.”

Public Statements/Positions on Energy Efficiency
None of particular relevance.

Public Statements/Positions on Transportation
“Our bridges, roads, and transportation systems--airports, rail, and ports--need to be modernized to keep our travelers safe, our economy on time, and attract businesses looking to invest in Montgomery County and Pennsylvania. Especially businesses in growing industries like technology and green energy.”

Public Statements/Positions on Climate
“Like most issues that scientists face, global warming cannot be explained by one cause alone. Variations in solar energy, the cyclical changes in the tilt, the orbit of the earth around the sun, the changing oceanic circulation, as well as human effects, can ALL contribute to this problem. A simple one answer solution is not obvious. Just as all cancers cannot be assumed to be caused by one agent, Global warming is a multi-factorial problem that will require evaluation from many angles to solve.”

Public Statements/Positions on Energy
Believes there is no need for the federal government to fund the development of renewable energy sources

Public Statements/Positions on Energy Efficiency
None of particular relevance

Public Statements/Positions on Transportation
“Strengthening our transportation system should be a top priority for our federal government. I believe we must invest in roads, bridges, ports, and airports and that the federal government is poised to bring public and private investment together. We need to incentivize the private sector to invest and join us in building a 21st century transportation system that leverages state, local, federal, and private money. But one thing that I cannot support is increasing the gas tax. Pennsylvania already has the highest gas tax in the nation– we cannot possibly add more of a burden to our drivers.”

South Dakota Public Utilities Commission

Public Service Accomplishments on EE and/or Clean Energy
Johnson’s campaign was supported by Citizens for Responsible Energy Solutions (CRES). While on the SD Public Utilities Commission, he oversaw hundreds of megawatts of new wind energy generation in the state and tax incentives. CRES said they are “proud to stand with Dusty Johnson in South Dakota because we know his unparalleled experience will help to modernize our nation’s electric grid and grow clean energy development across America.” Their ad says he supports energy independence by supporting domestic development of natural gas, nuclear, solar, and wind.

Public Statements/Positions on Climate
Nothing of particular relevance

Public Statements/Positions on Energy
In 2009, Johnson testified against the Clean Energy Jobs and American Power Act. He acknowledged the planet is warming and action is needed but believed this legislation would create regional disparities that would result in increased utility bills particularly for those in the Midwest.

Public Statements/Positions on Energy Efficiency
While promoting a PUC EE program, Dusty said “Very few of the homeowners we talk to realize that they can earn \$300 by purchasing a high efficiency water heater, furnace or heat pump. Energy efficient products are a good buy even without these incentives, but when you add a few hundred dollars to the equation, they make even more sense.”

Public Statements/Positions on Transportation

Public Statements/Positions on Climate
Burchett said he believes global warming is real but doesn't know that humans are causing it. "American public always pays the costs (for regulation). Other countries don't honor treaties, we should have to pay for it." He added that he is concerned about the environment as an organic gardener. His neighbor, a Democrat, uses weed killer. He uses goats.

Public Statements/Positions on Energy
"Energy is an economic issue, a jobs issue, and a national security issue. We are blessed with an abundance of natural resources that can provide our own people with cheap energy, create jobs, and protect our country. Instead of sending billions of dollars overseas to our enemies, let's invest in domestic resources like Oak Ridge National Laboratory right here in our backyard. Let's lift the restrictions on offshore drilling so Americans can enjoy the jobs and the energy we have here at home."
"One thing that's going to be critical is energy independence. That's why we're in all these wars. For the money we're spending, we could be finding the next clean energy. Oak Ridge could be involved in that."

Public Statements/Positions on Energy Efficiency
In 2017, Burchett's budget as Mayor approved \$99 million in bonds for construction projects including schools. Part of that was a \$10.5 million energy management project with Trane expected to generate \$6 million in energy savings by replacing light bulbs with LEDs, improving windows, and replacing HVAC systems.

Public Statements/Positions on Transportation
When asked if former EPA director Scott Pruitt deserved praise for rolling back environmental regulations, especially those tied to stricter fuel emissions, Burchett said "Yes."

Public Service Accomplishments on EE and/or Clean Energy
“We must invest in new and cleaner technologies that can compete in the marketplace without expensive and distortionary government subsidies.”

Public Statements/Positions on Climate
“The president was right to pull out of the costly and meaningless Paris Climate Agreement. That agreement was merely value signaling, not good policy.”

Public Statements/Positions on Energy
“Energy jobs are critical to our economy and must be a priority when considering any type of regulation or law coming out of Washington. There is no good reason to rely on Middle Eastern oil anymore. We should be drilling for even more clean natural gas and allowing exports around the world, so that everyone can enjoy cleaner and cheaper energy. Cheap energy has brought billions of people from the grips of poverty over the last century. Why stop now?”

“We must use our money to develop better infrastructure, not engage in hopeless attacks on our energy industry.”

“Protecting our energy industry and protecting the environment are NOT mutually exclusive. Our country has led the world in reduced CO2 emissions while also growing our economy at three percent. We have been able to do this because the energy sector has revolutionized natural gas exploration, allowing cleaner energy to be used and reducing emissions drastically.”

Public Statements/Positions on Climate
"It's up to use to protect the only planet we have. On #EarthDay we must commit to doing more to keep our water and our air clean, address climate change and make sure we pass on a healthy planet to our children."

Public Statements/Positions on Energy
"It is a misconception that we must choose between a healthy environment and a prosperous economy. We can protect our environment, combat climate change, lower energy costs, and incentivize economic growth simultaneously. Texas is an energy state, and we have a unique competitive advantage being the only state in the country with its own electrical grid. Texas can and should lead the way in renewable and clean energy, creating good paying jobs for hardworking Texans and protecting the planet for future generations. We are already doing it with wind energy. Texas is the top state in the country in wind energy protection and nearly 26,000 Texans make their living connected to the wind energy industry. As a nation we should continue to invest in wind, solar and other renewable and clean energy sources, and lead the way into a new generation of renewable and clean energy economic growth."

Public Statements/Positions on Energy Efficiency
None of particular relevance

Public Statements/Positions on Transportation
LCV endorsed Allred saying, "In Congress, Allred will work to reduce carbon pollution by helping Texas meet its tremendous clean energy potential and supporting investments in public transportation."
