

THE ALLIANCE TO SAVE ENERGY 50X50 TRANSPORTATION ACTION NETWORK

50 X50

THE TRANSPORTATION OPPORTUNITY

The U.S. transportation sector is on the verge of a major transformation. And with this transformation comes an opportunity to design how the sector will evolve, while ensuring energy efficiency is a cornerstone of mobility in the 21st century.

The new administration, pending FAST Act reauthorization, and the possibility of more economic stimulus measures mean that 2021 will be ripe with opportunities for advancing efficient transportation. Moreover, the racial justice protests of 2020 emphasized our nation's pervasive inequalities and reinforced the need to design a transportation system that works for all communities. While there is tremendous appetite in Washington for bold change, the razor-thin Democratic margins in Congress mean that a bipartisan approach is crucial.

THE 50X50 ACTION NETWORK

The 50x50 Action Network is a coalition of public, private, and non-governmental stakeholders committed to enacting bipartisan policies that will reduce the transportation sector's energy use 50% by 2050. The 50x50 Action Network envisions a highly integrated transportation system that runs on efficient vehicles powered by electricity, leverages U.S. innovation and federal government leadership, and provides benefits to all communities. Benefits to joining the 50x50 Action Network include:

POLICY DEVELOPMENT

**HILL AND ADMINISTRATION
ADVOCACY**

THOUGHT LEADERSHIP

**SPEAKING AND MEDIA
OPPORTUNITIES**

NETWORKING

JOIN US

The 50x50 Action Network is a single governing body of public, private, and non-governmental stakeholders. *\$10,000 financial commitment for participation.* To learn more about 50x50 Action Network engagement opportunities, please contact Felicia Kelly at fkelly@ase.org.
