

YEAR THREE

IN THE DECADE OF ENERGY EFFICIENCY
2012 ANNUAL REPORT

A YEAR IN REVIEW

The year 2012 was a milestone for us at the Alliance to Save Energy: We **celebrated 35 years** of advancing energy efficiency, and laid solid groundwork for another 35 years. Alliance President Kateri Callahan rang in the New Year – and new **lighting efficiency standards** – by appearing with New York City's LED-lit Times Square Ball. Throughout the rest of the year, we charged forward with consumer outreach, on-the-ground projects, and political advocacy to inject "using less, doing more" into people's daily lives. Enclosed are our proudest moments of 2012.

POLICY

Convened a Commission to Revolutionize Energy Policies

One of our major accomplishments in 2012 was the launch of a landmark taskforce that is poised to springboard far-reaching energy efficiency legislation. That taskforce – the **Alliance Commission on National Energy Efficiency Policy** – identified a set of public policies that have the power to double U.S. energy productivity by 2030. The EE Commission is now taking these policy recommendations to the Obama administration and the 113th Congress.

In another big win for the Alliance, our advocacy on Capitol Hill for the **"Shaheen-Portman" national energy efficiency strategy and an appliance standards bill** led to President Barack Obama signing several important provisions from these bipartisan bills into law. Meanwhile, our grassroots activism garnered 28,000 signatures for a petition urging Congress to **reinstate tax incentives for energy-efficient home upgrades**.

Alliance Commission on National Energy Efficiency Policy.

EVENTS

Brought Together Energy Leaders from Around the Globe

Our fifth **Energy Efficiency Global Forum (EE Global)**, set in sunny Orlando, Fla., convened the world's foremost thought leaders in energy efficiency to create a path toward widespread energy efficiency implementation.

In October, we unveiled the EE Commission's landmark research and policy recommendations at the ninth **Great Energy Efficiency Day** on the Hill. That night, we celebrated our 20th **Evening with the Stars of Energy Efficiency Awards Dinner** by

honoring the 2012 energy efficiency luminaries and 100+ past award winners.

In addition to our large conferences, we hosted exclusive meetings for Associate members with key policy makers, as well as a successful series of educational events for the public on topics like the Green Button Initiative and energy efficiency in congregations.

International energy leaders network at EE Global 2012.

PUBLIC OUTREACH

Grew Fans & Followers In-Person & Online

Our thousands of posts via social media doubled our **Twitter followers to 8,000** and grew our **Facebook fans to a whopping 40,000**. We also brought over **280,000 visitors to ASE.org**, produced more than 40 videos, and live-streamed two events.

Beyond our own communications channels, we were in-print and online with blog posts, letters to the editor, and quotes in publications like The Washington Post, Wall Street Journal, National Journal, USA Today, CQ/Roll Call, and The Hill.

And we were thrilled when Alliance President Kateri Callahan garnered meaningful media coverage at both **political conventions**, including a Politico panel at the Republican National Convention.

Kateri Callahan speaks at Politico Energy and the Presidency RNC event.

INTERNATIONAL

Helped Cities & Rural Areas Worldwide Save Energy

We strengthened energy efficiency policies and programs outside of the United States with help from our offices in India, Armenia, Ukraine, South Africa, and Mexico. This year we were especially excited about **leading eco-cities exchanges with Chinese officials**. In the fall, we helped bring 23 mayors and high-ranking ministry officials from Chinese cities to California cities, where they saw energy efficiency in action.

We also launched a successful donation campaign that supported our **Watergy program** in South Africa, helping the 1 million residents of drought-prone Nelson Mandela Bay save water and energy.

Our other international accomplishments were driving building codes in India, advancing National Energy Efficiency Action Plans for Buildings in Southeastern Europe, and expanding energy efficiency capacity at the national level in the Asia-Pacific Economic Cooperation (APEC) region.

U.S.-China Eco-Cities Mayoral Exchange delegates meet with Los Angeles city officials.

BUILDINGS

Made Energy Codes More Efficient

Standing on [our groundbreaking report](#) proving that homes built to the 2012 national model energy code saves thousands of dollars in energy costs, we mounted "boots on the ground" advocacy to convince states to reject attacks against building energy codes and adopt the 2012 code – which is 30% more efficient than the 2006 code. Meanwhile, our [Building Codes Assistance Project \(BCAP\)](#) encouraged 30 states to update their residential and/or commercial building energy codes. Now, 29 states meet the 2009 national model energy

codes for residential buildings, 34 states meet the 2007 standard for commercial buildings, and BCAP is helping a slew of states with gaps in code compliance make plans to achieve full compliance.

On the homes front, BCAP armed consumers with knowledge on energy codes through a [campaign with Consumers Union](#). Meanwhile, Alliance-affiliate [Small Town Energy Program for University Park \(STEP-UP\)](#) signed up 22% of University Park, Md., homeowners for energy audits.

STATES THAT MEET NATIONAL ENERGY CODES

- States that meet 2009 codes for residential buildings
- States that meet 2007 standards for commercial buildings

EDUCATION

Saved Millions of Kilowatt-Hours in America's Schools

Our **PowerSave Campus** program – which is on 23 campuses in six states – saved an impressive 209,000,000 kWh and won three Student Energy Efficiency Best Practice awards. What's more, 75% of "graduated" PowerSave Campus interns now work in the sustainability field.

Our **PowerSave Schools** program – which is in more than 300 K-12 schools in California, Kentucky, Alabama, Mississippi, Pennsylvania, Maryland and Tennessee – saved 19,000,000 kWh through

simple behavior change projects. Of particular note, the program reduced electricity use by 12.5% in 164 Memphis schools, and by 8.3% in seven Knox County (Tenn.) schools.

PowerSave Campus interns at their annual summit.

INDUSTRY

Advanced Energy Efficiency in Industrial Facilities

To advance energy efficiency in the industrial sector, we helped the **U.S. Council for Energy Efficient Manufacturing** improve its organizational growth by recruiting companies, establishing bylaws, and developing a business plan.

We also hosted an **Industrial Energy Efficiency Forum** that brought together about 60 industrial energy efficiency stakeholders and showcased two manufacturers (Volvo & Nissan North America) that achieved certification under the **Superior Energy Performance (SEP)** program.

On the regulatory side, we helped finalize a petition on expanding industrial-scale, electric motor energy efficiency standards that could save 4.4 Quads over 30 years if incorporated in the final rule.

Volvo & Nissan are recognized for their Superior Energy Performance certification at the Industrial Energy Efficiency Forum.

UTILITIES & GOVERNMENT

Promoted Energy-Saving Plans & Purchases

The **Clean and Efficient Energy Program (CEEP)** – our partnership with the American Public Power Association and the Large Public Power Council – helped public power utilities break down barriers to large-scale energy efficiency programs. CEEP helped energy efficiency program managers benchmark their utilities' performance and generate recommendations for improving public energy efficiency data. CEEP also set in motion a multi-utility retail incentive program that will reduce utilities' administration costs while

communicating with a unified national voice to retail partners.

Partnering with Lawrence Berkeley National Laboratory to improve energy management in the federal government, we worked to increase vendors' awareness of federal energy efficiency purchasing requirements. We also updated building guides with these requirements and made recommendations on improving energy efficiency labeling in government purchase catalogs.

SOUTHEAST REGION

Rallied Communities Around Energy Efficiency

The **Southeast Energy Efficiency Alliance (SEEA)** – our partner in the region – set off over 2,200 home retrofits, becoming the third-most productive of the country's 40 Better Buildings Neighborhood Program grant recipients. SEEA also helped Mississippi craft its first comprehensive, statewide energy plan; helped pass building code policy in Alabama and South Carolina; and led training to ensure code adoption.

We promoted energy efficiency in the Southeast region by co-hosting an **energy efficiency forum in Nashville** for regional utilities, as well as educating Southeast manufacturers with a campaign featuring a **video about SEP and ISO 50001**.

FINANCIALS

FINANCIALS

Independent Auditor's Report

To the Board of Directors
Alliance to Save Energy
Washington, D.C.

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Alliance to Save Energy and Affiliate (the Organization) which comprise the balance sheet as of December 31, 2012, and the related consolidated statements of activities, functional expenses and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Organization's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

FINANCIALS

Independent Auditor's Report

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Organization as of December 31, 2012, and change in their net assets and their cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As described in Note 10 to the consolidated financial statements, the net assets at January 1, 2011, have been restated for an error in method of revenue recognition.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated July 22, 2013, on our consideration of the Organization's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Organization's internal control over financial reporting and compliance.
